INSTALLATION

Press the button and select a desired mode. Then choose a place that can get enough sunshine to install the light, the more sunshine it gets, the longer it can illuminate.

Method 1: Ground Inserted

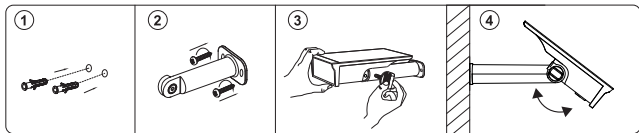

1. Fix solar landscape light and plastic rod1 by knob.
2. Connect the rods and spike in different combinations based on the height you need. then adjust the angle of the light and tighten the knob.

Note: Please insert the knob from the correct side as shown above.

Method 2: Wall Mounted

1. Use a drill bit to make two holes in the wall. Insert the provided expansion bolts into these holes.
2. Pass the screws through the screw holes of the rod1 and into the expansion bolts. Tighten the screws securely to firmly attach the bracket to the wall.
3. Adjust the angle of the light to your desired direction. Once positioned, tighten the rod1 and the light using the knob screw.

Note: Please insert the knob from the correct side as shown above.

SERIES MODEL INTRODUCTION

 This series features two models: RGB and CW (Cool White/Warm White). Please refer to the model you have purchased to adjust the light mode accordingly.

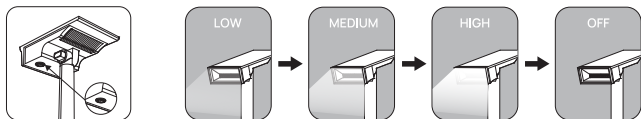

Model 1: RGB

Short Press: Cycles through the following modes.

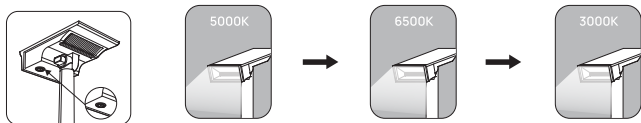

Model 2: CW (Cool White/Warm White)

Short Press: Cycles through the following brightness levels.

Long Press: Cycles through color temperatures every 2 seconds while holding the button. (While the lights are on.)

Releases the button to save the selected color temperature.

* The default color temperature is 5000K.

WARM TIPS

⚠ This light is designed to be waterproof and robust in structure, hence the battery is not replaceable!

1. Before using your landscape light for the first time, place it in direct sunlight for 3-5 days. This helps the battery charge fully and improves its lifespan, so landscape light works better and lasts longer.

2. During the installation, please make sure the landscape light is installed under direct sunlight where there is no shade or eave to shelter the solar panel. Otherwise, the lighting time will be shorter.

3. Whether the solar landscape lights can produce the best lighting effect or not depends on sunlight intensity, geographical location, weather conditions, seasons and other conditions.

TROUBLE SHOOTING

If the light doesn't turn on after a long period of inactivity, please try the following:

a) Place the solar panel directly under sunlight and leave it outdoors for 3 to 5 days.

b) The light will automatically reset the battery and related components.

c) Try pressing the power button again to turn it on.

d) If landscape light still doesn't work after following the steps above, please send a picture of the damaged product along with your order details to our customer service team. We'll get back to you within 1-2 business days with a quick solution.
